TRACEABLE MARINE PLASTIC

BY  WATERHAUL

The innovative Traceable Marine Plastic collection transforms marine waste into powerful promotional opportunities whilst actively contributing to ocean conservation. Each product in this range is made from plastic that was once polluting UK waters, creating premium promotional merchandise with genuine environmental impact that you can proudly share.

- > UK MANUFACTURED FROM RECYCLED MARINE PLASTIC
- > SOLAR-POWERED PRODUCTION FACILITY
- > FULLY TRACEABLE FROM OCEAN TO FINISHED PRODUCT
- > CMYK+W PRINTING AS STANDARD
- > 5% OF PROFITS GO TO SURFERS AGAINST SEWAGE

Through a three-stage process, marine plastic is systematically recovered from UK waters and coastal areas, then transformed using solar-powered manufacturing in Cornwall, and achieves zero waste through a circular production approach. Every product traced back to the ocean maximises the environmental benefit of each piece of marine debris recovered. 5% of profits from all Traceable Marine Plastic products will be donated to Surfers Against Sewage, extending the impact beyond material recovery. This groundbreaking material offers the perfect blend of traceability and marketing punch, delivering incredible promotional products that recipients will genuinely appreciate, whilst providing powerful sustainability stories to share.

“The scale of ocean plastic pollution is staggering with abandoned, lost, or otherwise discarded fishing gear considered the largest contributor to sea-based sources of marine plastic debris”
